ABOUT ME

A highly motivated problem solver, passionate about exploring new technologies and applying them to address real-world challenges.

EDUCATION AND TRAINING

Bachelor of Engineering - Information Technology

University of Mumbai [01/08/2019 – 31/05/2023]

City: Mumbai | **Country:** India | **Level in EQF:** EQF level 6

Bachelor of Engineering in Information Technology with core training in programming, data structures, databases, operating systems, computer networks, and software engineering. Gained practical skills in web technologies, data analytics, and system design through labs, projects, and internships, with strong emphasis on problem-solving and teamwork.

WORK EXPERIENCE

Arcon Techsolutions – Mumbai, India

Software developer

[19/06/2023 – 15/07/2025]

Developed and enhanced enterprise security product features, including building an email automation module with configurable reporting, scheduling, and email delivery. Worked on client-driven enhancements, data encryption for improved security, and resolution of critical bugs to ensure stable releases, using Angular, TypeScript, C#, .NET, and SQL-based databases.

SKILLS

Well organized, a motivated team player who is results driven / Time Management: / Angular / TypeScript

LANGUAGE SKILLS

Mother tongue(s): Marathi

Other language(s):

Hindi

LISTENING C2 **READING** C2 **WRITING** C2

SPOKEN PRODUCTION C2 **SPOKEN INTERACTION** C2

English

LISTENING C1 **READING** C1 **WRITING** C1

SPOKEN PRODUCTION C1 **SPOKEN INTERACTION** C1

German

LISTENING A1 READING A1 WRITING A1

SPOKEN PRODUCTION A1 SPOKEN INTERACTION A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

HONOURS AND AWARDS

[26/08/2022] Ministry of Education, India

Smart India Hackathon Selected as a Grand Finale Finalist at Smart India Hackathon 2022, contributing to the development of a multilingual translation platform. Built a web application enabling document translation and speech-to-speech translation using Django, Python, HTML, CSS, and Bootstrap.

PROJECTS

Skin Cancer Detection System • Developed a website to detect skin cancer to aid doctors and patients for early diagnosis of the disease. • Incorporated deep learning concepts like CNN and YOLO for faster and accurate image classification. • Used packages like pytorch and densenet for training of model.

Covid-19 Tracker • Built a web application to trace covid infection hotspots across the country. • Created an interactive map of India for data visualization using folium. • Integrated a Data API to update the live count of active cases, confirmed cases, deaths and recovered patients. Technologies used: HTML, CSS, Python, Django.

CERTIFICATIONS

[Great Learning, 01/12/2025]

Entrepreneurial Management

Mode of learning: Project based
